ZTE CORPORATION

中興通訊股份有限公司

(a joint stock limited company incorporated in the People's Republic of China with limited liability)

(Stock Code: 763)

Announcement

On the Application for Derivative Investment Limits of 2011

The Company and all members of the Board of Directors confirm that all the information contained in this announcement is true, accurate and complete and that there is no false or misleading statement or material omission in this announcement.

Important notes:

1. The “Resolution on the Application for Derivative Investment Limits of 2011 of the Company” was considered and unanimously passed at the tenth meeting of the Audit Committee of the Fifth Session of the Board of Directors of the Company, which also approved the submission of this resolution to the Board of Directors of the Company for consideration.
2. The “Resolution on the Application for Derivative Investment Limits of 2011 of the Company” was considered and unanimously passed at the Sixteenth Meeting of the Fifth Session of the Board of Directors of the Company. The resolution was adequately discussed by the Directors attending the meeting, who were aware of the types of the product, operating processes and risk management processes of investments in derivative products that the Company intended to make and the relevance of such investments to the day-to-day operations of the Company, and approved the tabling of this resolution at the general meeting of the Company for consideration.
3. The Company invests in two types of derivative products, namely fixed-income derivatives and value-protection derivatives. Investments in fixed-income derivatives are based on the foreign exchange payments of the Company, where the investment amount will match the cash flow of the Company. Investments in value-protection derivatives are based on our day-to-day import and export businesses, where the investment amount and investment period will match expected receipts and payments. The Company is forbidden to engage in speculative activities for profit-making. Derivative investments are subject to market risks, liquidity risks and contract performance risks and other risks.

I. Statement on the fulfillment of legal voting procedures in respect of investments in derivative products

In order to mitigate the impact of exchange rate risks in the international businesses of ZTE Corporation (the “Company”) and its majority-owned subsidiaries, derivative investments within the limits authorised by the Board of Directors and general meeting of the Company were conducted during 2010, effectively mitigating the adverse impact of exchange rate volatility on the Company. As the said authorisation will expire shortly, the Company intends to apply for authorisation to invest in value-protection derivatives for an amount not exceeding USD800 million against its US Dollar risk exposure, value-protection derivatives for an amount not exceeding EUR150 million against its Euro risk exposure and fixed-income derivatives for an amount not exceeding the equivalent of USD1,000 million. Such limits may be applied on a revolving basis during the effective period of the authorisation).

At the Sixteenth Meeting of the Fifth session of the Board of Directors of the Company held on 17 March 2011, the “Resolution on the Application for Derivative Investment Limits of 2011” was considered and passed. The resolution is subject to further approval at the general meeting of the Company, and the Board of Directors of the Company intends to table such resolution for consideration at the Annual General Meeting of 2010 of the Company to be held on 17 May 2011. The Independent Non-Executive Directors of the Company, namely Ms. Qu Xiaohui, Mr. Chen Naiwei, Mr. Wei Wei, Mr. Tan Zhenhui and Mr. Timothy Alexander Steinert, have reviewed the resolution and furnished an independent opinion. The five Independent Directors are of the unanimous view that the Company’s investment in derivative products is closely related to its day-to-day operational needs and that risks involved are controllable, and that it is in compliance with relevant provisions of pertinent laws and regulations.

The matter is not deemed as a connected transaction and therefore is not subject to the voting procedures applicable to connected transactions.

II. Types of investments in derivative products

The Company invests in two types of derivative products, namely fixed-income derivatives and value-protection derivatives. Investments in fixed-income derivatives generate guaranteed income and involve investments in a range of financial products provided by financial institutions, leveraging opportunities in interest rate markets for different currencies and differences in exchange rates quoted in different currency markets in a given timeframe. Such investments primarily involve foreign exchange forward contracts and agreements to pledge foreign exchange payables. Value-protection derivative investments seek to preserve capital value by utilising foreign exchange products provided by financial institutions, so that the Company may mitigate the impact of exchange rate volatility in day-to-day operations on its assets, liabilities and profitability. Value-protection derivative investments primarily involve foreign exchange forwards and structured forwards, complemented by foreign exchange swaps and foreign exchange options.

III. Principal terms of derivative investments

1. Duration of contract: not more than 1 year
2. Counterparties: banking financial institutions

3. Liquidity arrangements: Investments in fixed-income derivatives are based on the foreign exchange payments of the Company, where the investment amount will match the cash flow of the Company. Investments in value-protection derivatives are based on day-to-day import and export businesses, where the investment amount and investment period will match projected receipts and payments.
4. Other terms: Investments in derivative products will primarily be financed by the integrated bank credit facilities available to the Company without requiring any deposit payment by the Company, and shall be settled upon maturity on the basis of the principal amount or the price difference.

IV. Justification of investments in derivatives

The derivative investment business to be conducted by the Company is closely related to its day-to-day operation. Currently, the Company has in stock a significant amount of raw materials and equipment denominated in foreign currencies. To manage the risk of exchange rate volatility associated with foreign exchange payments for imports, investments in fixed-income derivatives are conducted to lower exchange losses and enhance the Company's competitiveness. On the other hand, as the Company's foreign exchange income continues to grow, the mismatch of currencies in receipts and payments will result in increasing foreign exchange risk exposure involving mainly USD and EUR. To prevent the Company's profit and shareholders' equity from being adversely affected by exchange rate fluctuations, it is necessary for the Company to conduct value-protection derivative investments to reduce its foreign exchange risk exposure.

V. Management of for derivative investments

1. The Company has formulated the "System for Risk Control and Information Disclosure relating to Investments in Derivatives" (《衍生品投資風險控制及信息披露制度》) and Measures for the Administration of Investments in Derivatives" (《衍生品投資管理辦法》) to lay down specific provisions relating to risk controls, review procedures and subsequent management for the Company's derivative investments, so that derivative investment activities will be subject to effective regulation and risks associated with derivative investments will be duly controlled.
2. The Company has formed an investment work group headed by the chief financial officer and comprising professional personnel for investment decision-making as well as trade operations, who will be specifically responsible for conducting investments in derivative products and drawing up relevant investment plans to be implemented subject to the scope of authorisation mandated by the Board of Directors or the general meeting.
3. The members of the investment work group of the Company are fully aware of the characteristics and potential risks of investments in derivative products and are operating in strict compliance with the operational and risk management systems for derivative investments.

VI. Risk analysis for derivative investments

- 1 Market risks: For fixed-income derivatives, gains were recognised at maturity. Gains or losses arising from the change in fair value as a result of differences in domestic and overseas forward quotations during the investment period are accounted for as variable gains or losses, which will not affect the ultimate gains of the derivatives. Gains or losses arising from the difference between the agreed exchange rate for transaction and the exchange rate prevailing on the maturity date will be accounted for as gains or losses on revaluation for each accounting period during the effective period of the value-protection derivative products. Effective gains or losses shall be represented by the cumulative gains or losses on revaluation on the maturity date.
2. Liquidity risks. Fixed-income derivative investments warrant little liquidity risks as they are based on the foreign exchange payments for imports and do not effectively take up any available funds. Value-protection derivatives are based on projected receipts and payments in foreign exchange. As they match the actual amounts of receipts and payments in foreign exchange, it is assured that there would be sufficient funds for settlement upon completion, with little impact on the Company's liquidity assets.
3. Contract performance risks. The counterparties to the Company's derivative investments are banks with sound credit ratings and long-standing business relationships with the Company, which basically give rise to no risk in terms of contract performance.
4. Other risks: Failure of personnel in charge to operate derivative investments in accordance with stipulated procedures or fully understand information regarding derivatives may result in operational risks in actual operation; Obscure terms in the trade contract may result in legal risks.

VII. Risk management strategy for derivative investments

1. Any investments in derivative products conducted by the Company shall be aimed at mitigating the impact of exchange rate volatility on the Company. which is forbidden to engage in speculative activities for profit-making. Any derivatives investments of the Company shall be limited to the authorised cap approved by the Board of Directors or the general meeting. Also, the Company is not allowed to conduct any leveraged derivative investments.
2. Prior to conducting any derivative investments, the investment work group of the Company will conduct risk analyses for such investments and draw up investment plans (including investment types, duration, amounts and counterparty banks) and feasibility analysis reports to the Risk Management Committee of the Company for risk examination, all of which shall be subject to the final approval of the chief financial officer.
3. The investment work group shall submit investment contracts for derivative investment to the chief financial officer for approval and implement such contract after approval.
4. The Company enters into contracts with clear and precise terms with counterparty banks and stringently implements the risk management system to prevent legal risks.

5. The Risk Management Committee of the Company will track changes in the open market prices or fair values of the derivative products, conduct timely assessment of changes in the risk exposures of invested derivative products, and report to the Audit Committee of the Board of Directors on a regular basis. If any irregularities are identified, they will promptly be reported to the Audit Committee of the Board of Directors and reminders will be given to the investment work group for the application of contingency measures.

6. Regular auditing of derivative investments shall be undertaken by the internal audit department of the Company to ensure compliance.

VIII. Fair value analysis of derivative investment

The investments in derivative products to be conducted by the Company are primarily foreign exchange trading involving USD and EUR currencies, which are actively traded in highly transparent markets. The fair values of the derivatives can be sufficiently reflected in the traded prices and daily settlement prices of such currencies, which will be determined by the Company based on prices quoted by or obtained from service providers such as banks and the Reuters system.

IX. Accounting policy and subsequent disclosures regarding derivative investments

1. The accounting treatment of the Company's derivative investments shall be determined in accordance with the Accounting Standards for Business Enterprises.

2. The Risk Management Committee of the Company will report to the Board of Directors when the aggregate loss or variable loss of the invested derivatives of the Company (representing the sum of the fair value impairment of the invested derivatives and the change in value of the assets used for risk hedging (if any)) exceeds RMB10 million and publish an interim announcement for timely disclosure when such loss reaches 10% of the latest audited net assets of the Company.

3. Relevant information on derivative investments in force will be disclosed in the regular reports of the Company.

X. Independent Non-Executive Directors' Opinion

The Independent Non-Executive Directors of the Company, namely, Ms. Qu Xiaohui, Mr. Chen Naiwei, Mr. Wei Wei, Mr. Tan Zhenhui and Mr. Timothy Alexander Steinert, have reviewed the Company's planned derivative investments and furnished an independent opinion in relation thereto as follows:

As the foreign exchange income of the Company and its majority-owned subsidiaries has been increasing in line with the ongoing development of their international businesses, the mitigation of exchange rate volatility risks associated with foreign exchange operations by locking up currency translation costs through the reasonable application of financial derivative instruments is beneficial to the enhancement of the financial stability and competitiveness of the Company. The Company has conducted meticulous internal assessment in respect of the investment in derivative products and has

established relevant regulatory regimes. We are of the view that the engagement of derivative investments by the Company is closely related to its day-to-day operational needs and that risks involved are controllable, and that it is in compliance with relevant provisions of pertinent laws and regulations.

By Order of the Board

Hou Weigui

Chairman

Shenzhen, PRC

17 March 2011
